WORK EXPERIENCE

SOFTWARE ENGINEER | Jan 2023 - Present
FENDAHL INTERNATIONAL PVT LTD

- Collaborated with registration and login team to establish **restful Web APIs** using **dotnet core**.
- Led different teams to develop registration, examination, and result capabilities, incorporating JWT and refreshed tokens.
- Developed dynamic menus for specific roles based on database data.
- Collaborated with the Exam team to create a dynamic exam scheduling and result page.
- **Technical stack:** Dotnet core, MSSQL, Bootstrap, JS.

PYTHON DEVELOPER | Dec 2021 - Mar 2022
CHATBUCK MESSENGER PVT LTD

- Implemented a robust dashboard utilizing Django, Bootstrap, and MongoDB to facilitate CRUD operations for the **Chatbuck App**.
- Collaborated with my team to develop, test, and integrate the API.
- Successfully addressed the issue of auto-increment in MongoDB by utilizing Pymongo.
- Resolved a problem of displaying data from MongoDB in Django-admin by utilizing a new library.
- Developed a mock chat app to better comprehend the mechanics of real-time chat.
- **Technical stack:** Django, MongoDB, Bootstrap/Tailwind.

FULL STACK DEVELOPER | July 2021 - Nov 2021
ALORHAN PVT LTD

- Contributed to homepage design and fetched data from the Drivers page to the database while working with the logistics team. The use of **ReactJS** implementation led to significant website speed improvement.
- Collaborated with a team to build a landing page for an auto-parts website. Integrated email functionality to enhance customer service.
- Worked on a voting website project, utilizing **Laravel**, Bootstrap, and AJAX for its design and development.
- Created both frontend and backend payment integration for a pharma website.
- Designed and developed the Travelpayout API for a travelling website.
- **Technical Stack:** Laravel, MySQL, ReactJS, Bootstrap, JS.
